iTOVi

PERSONAL SCANNER

INTRODUCTION

Most everyone, including pets struggle to reach a healthy balance due to factors such as poor sleep, stress, diet, sickness and other health issues. iTOVi is a tool to help communicate with your body to achieve this balance. The iTOVi scanner interprets your body's needs and provides a personalized report of the supplements and essential oils the body wants.

HOW IT WORKS

Electrical Frequency

Everything has a frequency. iTOVi has measured the unique frequencies of vitamins, supplements, essential oils and biopoints. The iTOVi scanner sends these frequencies into the body and induces a measurable response.

Bioimpedance

Bioimpedance is the process of introducing a stimulus to the body that causes recordable reactions. A small electrical current passes through specific points in the body called biopoints. Biopoints refers to a digital signal associated with certain areas of the body, such as organs, vertebrae and other vital parts of the bod

The Body's Response

Bioimpedance relies on the body's autonomic nervous system to elicit reactions. When electrical currents are sent, tissue becomes more or less resistant to these frequencies and the iTOVi scanner measures these reactions..

Algorithm

ITOVi's method of assessing your body's reaction is highly accurate. A complex algorithm translates many mathematic equations into easy to understand results.

Report

As the scan ends, the number of unresolved biopoints are recorded, analyzed and compiled into a personalized iTOVi report. Based on the information gathered, the iTOVi mobile app will recommend the essential oils and supplements to which your body had the best reactionary response.

APPOINTMENT

Call to schedule your pet (s)
iTovi Scan today!
All species welcome!

Tania D. Woerner, VMD
Tally Oaks Veterinary Service
19302 Silcott Springs Road
Purcellville VA 20132
540 338 7081

PRICING

Initial scan: $35

Follow up Scan: $20

*additional charge possible for sick patient scans

RE-SCAN

EVERY 4 DAYS DURING CRISIS

EVERY 2 WEEKS or AS NEEDED FOR MAINTAINCE
